Datafund

FOUNDING PARTNER PROPOSAL · 2026

PLUR Enterprise for IGEA

50 seats · 1,400 repositories · 12-month commitment · self-hosted organisational memory & learning for people and agents.

ISSUED TO	IGEA d.o.o. · Brezovica pri Ljubljani, SI	CONTACT	gregor@datafund.io
ISSUED BY	Datafund d.o.o. · Ljubljana, SI	VALID THROUGH	31 May 2026
COMMITMENT	12 months from go-live (June 2026)	FOUNDING PARTNER COHORT	First 5 companies only

§ 01
EXECUTIVE SUMMARY

Turn every engineer, every agent, and every repo in IGEA into compounding capital.

Datafund proposes a Founding Partnership installing PLUR Enterprise — persistent, correction-based organisational memory & learning — across 50 seats and 1,400 repositories, with a 12-month commitment from go-live.

THREE WORKSTREAMS, ONE PARTNERSHIP

A **PLUR Enterprise subscription** — the product. Multi-user MCP server, knowledge graph, semantic memory, SSO, audit. Managed operations, support, and maintenance included.

50 SEATS · €1,750/MO MINIMUM · 12-MONTH COMMITMENT

B **Integration & deployment** — one-time. Deployment to your infrastructure and project management for the rollout. GitLab SSO, group / project sync and the setup workshop are **included at no charge**.

CUSTOM WORK · INVOICED ON ACTUALS AT €85/H

C **Knowledge Engineering** — one-time. We build a custom ETL pipeline tuned to your codebase, curate 30 active repos with your tech leads, then automate the remaining 1,370. **You keep the pipeline.**

CUSTOM WORK · INVOICED ON ACTUALS AT €85/H

> **Founding Partner terms.** 30% off list on the subscription, guaranteed for life. €1,750/month covers your first 50 seats — that's the minimum whether you activate 10 or 50. Additional seats at €35/seat, same rate. Same terms apply to Datacore Enterprise when it is scoped together later in the year.

§ 02
SCOPE
& SYSTEM

What is shipped, in detail.

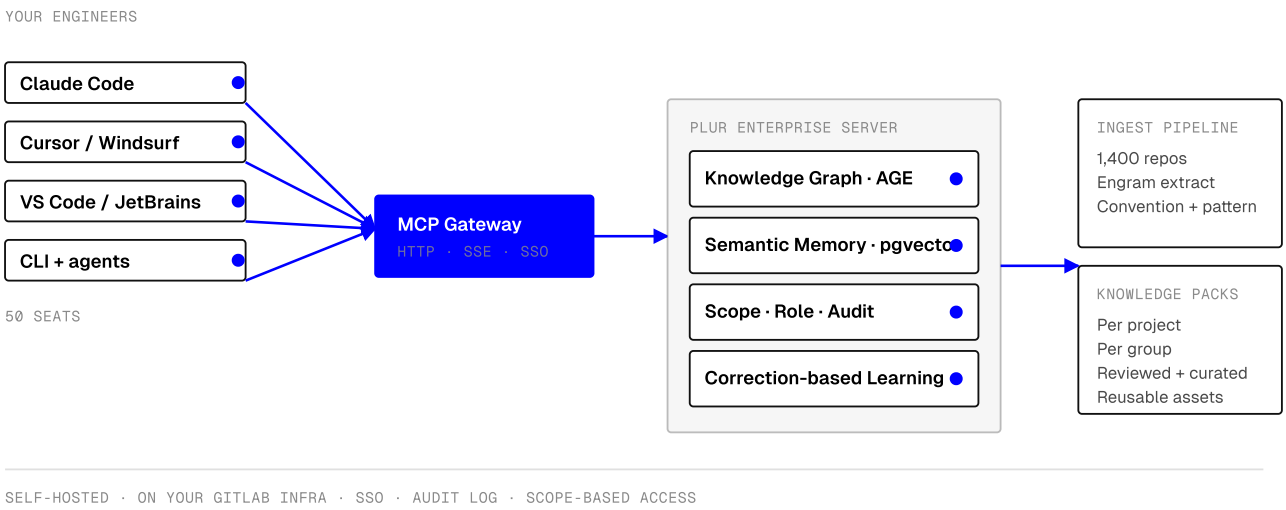
PLUR Enterprise is a self-hosted, multi-user memory platform. It slots in between your engineers, their agents, and your GitLab-hosted codebase. Every interaction with the system is scoped, logged, and reversible.

§ 02.1 · INCLUDED IN THE SUBSCRIPTION

#	CAPABILITY	WHAT IT DOES	SURFACE
01	**PLUR server**	HTTP/SSE MCP gateway, multi-user, multi-tenant	MCP CLIENTS
02	**Knowledge graph**	PostgreSQL + Apache AGE — graph over conventions, decisions, entities	SQL + GRAPHQL
03	**Semantic memory**	pgvector — embedding store, native SQL	SQL + API
04	**Correction learning**	Every review / revert / rewrite becomes a first-class signal	PIPELINE
05	**SSO**	OIDC / OAuth2 + PKCE against your IdP	YOUR IDP
06	**Access control**	Scope-based + role-based; per project, per group	ADMIN
07	**MCP tool security**	Tool allowlist, write enforcement, signed audit log	ADMIN
08	**Admin dashboard**	Usage, health, audit — for IT and compliance	WEB UI
09	**Ops**	TLS, CI/CD, monitoring, alerting — operated by Datafund	MANAGED
10	**Maintenance**	Security patches, dependency updates, platform upgrades	MANAGED
11	**Support SLA**	Priority bug fixes · <24h response · <72h resolution	CONTRACT
12	**Cadence**	Weekly check-in + quarterly strategic review	PARTNERSHIP

§ 03
ARCHITECTURE

Self-hosted. Standard parts. Your infrastructure stays yours.



§ 03.1 · DATA RESIDENCY

Deployment on your GitLab infrastructure. Source code, graph data and prompts never leave your network. LLM routing is yours — self-hosted, regional-EU, or commercial — through a gateway we configure with you.

§ 03.2 · STACK

PostgreSQL, Apache AGE, pgvector, Docker, Linux, OIDC. No proprietary runtime, no exotic vector database. Your ops team reviews it in an afternoon.

§ 03.3 · CONTROLS

Scope + role access, tool allowlist, write enforcement, tamper-evident audit log. Maps cleanly to your existing security controls.

§ 04
SUBSCRIPTION PRICING

Flat, per-seat, no surprises.

The subscription price is the only recurring line in this proposal. Managed operations, support, maintenance, platform upgrades — all included. Infrastructure and AI tokens are yours — paid directly to your provider.

FOUNDING PARTNER RATE

€35

PER SEAT · PER MONTH · 50 SEATS · 30% OFF LIST

LIST PRICE PER SEAT	€50/mo
FOUNDING PARTNER DISCOUNT	30%
FOUNDING PARTNER PER SEAT	**€35/mo**
SEATS	50
Minimum monthly commitment	**€1,750**/MO
COMMITMENT	12 months from go-live

§ 04.1 · MARKET CONTEXT (MONTHLY, PER SEAT)

PRODUCT	PRICE / SEAT / MO	MEMORY	CORRECTION-BASED LEARNING	SELF-HOSTED
GitHub Copilot Enterprise	$39–60	28-day window	No	No
Augment Code Standard	$60	Project-scoped	No	No
Sourcegraph Cody Enterprise	$59	None (search)	No	Yes (Ent.)
JetBrains AI Enterprise	$60+	None	No	No
PLUR Enterprise · list	**€50**	Persistent graph + semantic	**Yes**	**Yes**
PLUR · Founding Partner	**€35**	Same	**Yes**	**Yes**

The Founding Partner rate is guaranteed for life. €1,750/month is the minimum commitment — it covers your first 50 seats whether you activate 10 or 50. Additional seats added at the same €35/seat rate, no renegotiation. The guarantee extends to every future PLUR and Datacore product.

§ 05

ONE-TIME
CUSTOM WORK

One go-live package. Three line items.

Integration, pipeline and rollout are scoped together as the path to a working install. Custom work is billed monthly on actuals at **€85/h**.

A Integration — GitLab & Deployment

ONE-TIME · CUSTOM WORK · GITLAB SSO, GROUP SYNC & WORKSHOP INCLUDED

ESTIMATE
€2,380
28 H · €85/H · ON ACTUALS

#	DELIVERABLE	PRODUCT	TECH	DEVOPS	DATA+PM	COST
1	GitLab OAuth2 / OIDC + PKCE integration					INCLUDED
2	GitLab group / project membership sync + webhooks					INCLUDED
3	Deployment & configuration for your GitLab instance		4	8		€1,020
4	Setup workshop (all hands, 2–3h)					INCLUDED
5	Project management & weekly check-ins (all phases)				16	€1,360
	Subtotal		**4**	**8**	**16**	**€2,380**

B Knowledge Engineering — Phase A · Pipeline + 30 active repos

ONE-TIME · CUSTOM WORK · TECH-LEAD DRIVEN · YOU KEEP THE PIPELINE

ESTIMATE
€5,440
64 H · €85/H · ON ACTUALS

#	DELIVERABLE	PRODUCT	TECH	DEVOPS	DATA+PM	COST
1	Extraction strategy & kickoff with tech leads				8	€680
2	Custom ingest pipeline development (reusable)	4	16		4	€2,040
3	First 5 repos — extraction + tech-lead review cycle	4			8	€1,020
4	Remaining 25 repos — batch extraction + refine PIPELINE ACCURACY IMPROVES WITH EACH BATCH – PROGRESSIVELY LESS MANUAL REVIEW NEEDED.	4			8	€1,020
5	Pipeline handover + phase report		4		4	€680
	Subtotal	**12**	**20**		**32**	**€5,440**

INFRA AND AI (TOKEN) COSTS ARE NOT INCLUDED – PAID DIRECTLY TO YOUR PROVIDER.

C Knowledge Engineering — Phase B · 1,370 repos (automated)

ONE-TIME · CUSTOM WORK · PIPELINE REUSE FROM PHASE A

ESTIMATE
€1,870
22 H · €85/H · ON ACTUALS

#	DELIVERABLE	PRODUCT	TECH	DEVOPS	DATA+PM	COST
1	Batch run on all remaining repos + monitoring				8	€680
2	Outlier review & quality pass	2			8	€850
3	Coverage report & final handover				4	€340
	Subtotal	**2**			**20**	**€1,870**

INFRA AND AI (TOKEN) COSTS ARE NOT INCLUDED – PAID DIRECTLY TO YOUR PROVIDER.

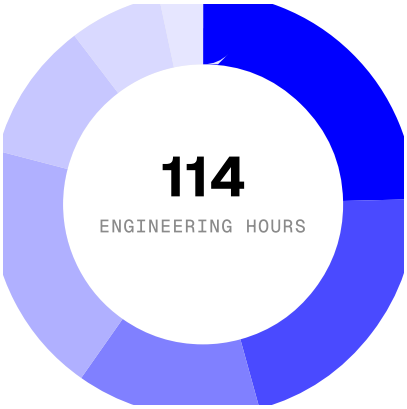
§ 05.2 · EFFORT BY DOMAIN



DOMAIN	HOURS	SHARE
Pipeline engineering	28 h	25%
Convention extraction & review	24 h	21%
Project management & check-ins	16 h	14%
Batch run & coverage	22 h	19%
Deployment & DevOps	12 h	11%
Strategy & planning	8 h	7%
Handover & documentation	4 h	4%
Total	**114 h**	**100%**

HOUR BUDGET

INTEGRATION	28 h
GITLAB SSO + GROUP SYNC + WORKSHOP	INCLUDED
DEPLOYMENT + PROJECT MANAGEMENT	28 H
KNOWLEDGE ENGINEERING – PHASE A	64 h
KNOWLEDGE ENGINEERING – PHASE B	22 h
Total engineering hours	**114 h**
BLENDED RATE	€85/h

COST POSTURE

Invoiced monthly on actuals. No fixed-price risk premium, no markup on AI compute. The hours on the previous page are a working budget, not a ceiling — you see them as they happen. The pipeline does the extraction; we bill for engineering and review, not for watching scripts run.

> **What you take home:** a tuned ingest pipeline; 30 curated repos; 1,370 auto-processed repos with coverage report.

§ 06

TIMELINE
& MILESTONES

From contract to coverage in four months.

WORKSTREAM	MAY W1	W2	W3	W4	JUN	JUL	AUG	Q3/Q4
Contract & kick-off								
Integration — GitLab, SSO, deploy								
Phase A — 30 active repos (curated)								
Feedback loop with tech leads								
Test run — 10–15 users								
Go-live · subscription starts								
Phase B — 1,370 repos (automated)								
Coverage report								
Datacore Enterprise — scoped together								

Integration + test run in May are custom work only. No subscription charges before go-live on 1 June 2026.

Q3/Q4 2026 — Datacore Enterprise. Scoped together once the memory layer is producing. Priced on same Founding Partner terms.

§ 07

RETURN ON INVESTMENT

The subscription pays for itself in the first month of use.

> Every developer recovers ≈ €315 of time a month. PLUR costs €35 / dev / month. Everything else — faster onboarding, fewer repeated mistakes, higher agent accuracy — is upside.

PER-DEVELOPER MATH (MONTHLY)

TIME RECOVERED / DEV / DAY	15 min
WORKING DAYS / MONTH	~18
BLENDED HOURLY VALUE	€70
Recovered value / dev / month	**≈ €315**
PLUR cost / dev / month	**€35**
PAYBACK PER DEVELOPER	within the first month

CONTEXT

McKinsey puts developer time spent searching for information at **1.8 hours / day**. GitHub reports context-switching costs engineering organisations an average of **~€50,000 per developer per year**.

We model **15 minutes / day** — roughly an eighth of McKinsey's number. Even at that level the subscription pays for itself in the first month of use, before the memory layer has had time to compound.

> **Upside not modelled.** Faster onboarding and higher agent success rates on your conventions.

§ 07.1 · DATACORE ENTERPRISE — FOUNDING PARTNER INDICATIVE PRICES

AI ROLE	DESCRIPTION	€/MO (INDICATIVE)
AI Chief of Staff	Org-wide operational intelligence.	€800
Insight Agent	Proactive pattern detection across repos.	€600
Onboarding Companion	Interactive buddy for new developers.	€400

Pricing is per AI role per month. Exact scope and commercials agreed in Q3/Q4 2026. Founding Partner 30% discount applies on the same terms.

§ 08

FREQUENTLY ASKED

Questions before the first call.

IS IT SELF-HOSTED?

Yes. PLUR Enterprise runs inside your infrastructure — no source code, graphs or prompts leave your network. LLM calls go to the provider you choose (self-hosted or commercial), routed through your gateway.

HOW IS THIS DIFFERENT FROM COPILOT?

Copilot autocompletes. PLUR remembers. It retains conventions, decisions, corrections and context across repos and years, and serves them back to any agent or engineer on demand.

DO YOU NEED ACCESS TO EVERY REPO?

No. We scan the 30 active repos high-touch, then run the automated pipeline across the rest. You choose which repos are in scope and when they enter.

WHY "FOUNDING PARTNER"?

Because we are shipping this together. Your requirements define the enterprise feature set, you receive 30% off for life, and you hold white-label & reseller rights for your own vertical.

HOW DOES IT FIT OUR SECURITY MODEL?

SSO through your IdP, scope-based access, tool allowlist, write enforcement, tamper-evident audit log. We co-author the threat model and the mapping to your controls during integration.

WHAT HAPPENS TO THE LEARNING IF WE LEAVE?

You keep it. The knowledge graph, engrams and packs are your property. You export them at any time, in open formats.

WHO OWNS THE IP?

You own all extracted knowledge. Datafund retains IP in the PLUR platform itself. The Founding Partner terms guarantee you the best commercial rate, always.

WHAT IF WE USE FEWER THAN 50 SEATS?

You pay €1,750/month regardless — that's the minimum commitment. It covers up to 50 seats whether you activate 5 or 50. Additional seats beyond 50 are €35/seat/month, same Founding Partner rate.

§ 08.1 · TERMS & CONDITIONS

01 All prices exclude VAT.

02 Subscription: 12-month commitment starting at go-live (June 2026). €1,750/month minimum covers up to 50 seats; additional seats at €35/seat/month.

03 Founding Partner rate is guaranteed for life — best-rate clause binding.

04 Integration and Knowledge Engineering invoiced monthly on actuals at €85/h.

05 Datacore Enterprise scoped and priced together in Q3/Q4 2026.

06 IP: you own all extracted knowledge; Datafund retains IP in the PLUR platform.

07 Integration phase is custom work only — no subscription charges before go-live.

08 Infrastructure (hosting, hardware) and AI token costs are not included in the subscription or custom work estimates. These are paid directly to your provider.

§ 09
COMMERCIALS
& ACCEPTANCE

Let's start the Founding Partnership.

One recurring line for the subscription, and two one-time custom engagements invoiced on actuals. Each is contracted and approved on its own — no bundled grand total.

#	LINE	BASIS	AMOUNT
A	**PLUR Enterprise subscription** 50 SEATS INCLUDED · €35/SEAT FOR ADDITIONAL · €1,750/MO MINIMUM	Recurring · 12-mo commitment	€1,750/MO
B	**Integration & deployment** 28 H ESTIMATE · CUSTOM WORK · GITLAB SSO, GROUP SYNC & WORKSHOP INCLUDED	One-time · on actuals @ €85/h	€2,380 EST.
C	**Knowledge Engineering — Phase A + B** 86 H ESTIMATE · CUSTOM WORK	One-time · on actuals @ €85/h	€7,310 EST.

All amounts exclude VAT. One-time estimates are working budgets, invoiced monthly against real hours. Subscription and custom work are contracted on separate schedules.

§ 09.1 · ACCEPTANCE

Reply to gregor@datafund.io. We will send the Founding Partner contract within 48 hours and schedule kick-off for the first working day of May.

Next step — not a signature. Reply *"let's talk"* and we schedule the first call. The full terms are negotiated in the Founding Partner contract, not here.

§ 09.2 · WHAT THE FOUNDING PARTNER TIER HOLDS

We are limiting the first PLUR Enterprise cohort to five companies who help shape the product. IGEA would be one of them. Beyond the headline discount, the partnership carries:

- Guaranteed best rate, for life.
- Influence on the product roadmap.
- White-label & reseller rights in your vertical.
- Same terms carry to Datacore Enterprise.
- Case study, co-authored, mutually approved.
- No subscription charges before go-live.
